## FIELD OF THE INVENTION

15

The present invention relates to surgical methods and assemblies employing the application of electrical energy to tissue to achieve a predetermined surgical effect, and, more particularly, to achieve such effect with reduced likelihood of inadvertent tissue damage and with better control of energy application to tissues.

## BACKGROUND OF THE INVENTION

20

The potential uses and recognized advantages of employing electrical energy for surgical purposes are ever-increasing. In particular, for example, electrosurgery techniques are now being
